

Aaron Rail drives forward with £600k fleet investment

June 13, 2022

Aaron Rail is delighted to announce it has invested more than £600k in a new fleet of 35 vehicles for its project teams.

The firm has purchased a range of vans including Citroen Berlingo and six-seater Ford Transits, all coming wrapped with the **Aaron Rail** and **Aaron Guard** liveries.

The new vehicles come complete with tracking and sensor technology to ensure our drivers are moving around Britain's roads safely and complying with speed regulations.

Discussing the new fleet, **Aaron Rail's** Managing Director, David Barnett, said: "This is a significant investment for **Aaron Rail** and shows our commitment to providing high-quality equipment and facilities for our teams. The new vehicles will allow our staff to travel to our offices and between sites safely and comfortably, while also showcasing the **Aaron Rail** and **Aaron Guard** brands on the road.

Dave added: "As part of this ongoing investment we also have plans to purchase a new Electric Vehicle (EV) fleet, to help with our sustainability policy and commitment to becoming a net zero carbon emission

business by 2030. This is an exciting time for **Aaron Rail** and we look forward to making further announcements on investments and business developments soon.”

Aaron Rail offers a range of specialist services to the rail industry, including Minor Civil Engineering, Drainage & Surveys, Track Maintenance, Site Access Control, PC Support and Contingent Labour.

The company also recently received its Principal Contractors License from Network Rail, allowing us to operate as a Principal Contractor on Network Rail Managed Infrastructure.
