

Bridging the gap with stainless steel partnership

May 20, 2021

Kloeckner Metals UK has partnered with Outokumpu to supply Stainless Steel materials to the UK market.

The experts in production of Duplex Stainless Steel, Outokumpu's range includes Austenitic, Ferritic, Duplex and Martensitic Stainless Steel grades.

Daniel Pyke, rail expert at Kloeckner Metals UK, said: "Traditional steel bridges cost more to maintain than they do to build. Duplex stainless rewrites tradition offering virtually maintenance free structures delivering cost, availability, safety and sustainability benefits to both infrastructure owners and railway, road and pedestrian users for generations to come."

Whether chosen for its aesthetics, its low maintenance or its sustainability benefits, duplex stainless should be on your list when building for the future".

Construction bridges with Duplex Stainless Steel includes:

- Pooley Road bridge

- Añorga rail bridge in San Sebastian
- Helix bridge in Singapore
- Sölvenborg bridge largest pedestrian and cycling bridge in Europe
