

Charlotte Robinson wins Infrastructure Award at Amazon Everywoman in Transport & Logistics Awards

July 28, 2021

Charlotte Robinson, a Rail Planner at Dyer & Butler, a part of M Group Services, has been named winner of the Infrastructure 'Above and Beyond' Award at the 2021 Amazon Everywoman in Transport and Logistics Awards.

Charlotte was recognised for her instrumental contribution to the creation of a 'site competency and skills matrix' that has delivered significant benefits in safety, site supervision, communication and time and cost efficiencies.

Charlotte's 'above and beyond' approach to her role as a Dyer & Butler STEM ambassador was also recognised. Charlotte's STEM activities include mentoring members of a 'Girls in Engineering Club' at her former secondary school and establishing a work experience programme that creates tailored plans for students.

Richard Walker, Managing Director, Dyer & Butler, commented: "I would like to congratulate Charlotte for

this impressive and thoroughly deserved industry recognition. Creating an inclusive working environment is vital as businesses look to attract and retain the best talent and these awards provide a wonderful platform to showcase progression, accomplishments and increasing avenues of opportunity within a traditionally male-dominated industry.”

Charlotte commented: “I am extremely proud to be named as a winner at the 2021 Amazon Everywoman in Transport & Logistics Awards in the Infrastructure Above & Beyond category.

“I was amongst amazing finalists and I feel honoured to be recognised alongside such diverse female talent who lead the way and inspire within the Transport & Logistics sector - an industry too often seen as male-dominated. Also thank you to Dyer & Butler for the nomination and recognition of going ‘above and beyond’ for the business.”
