

# Costain picks its new energy director

June 13, 2022

Matt Browell-Hook has been appointed by **Costain** to be its new energy director.

He has more than 18 years of energy market experience.

Matt joins the team from **Kent**, where he had responsibility for oil and gas within UK and Europe and focused on the management of assets through their lifecycle and the energy transition.

At **Costain**, he will lead the business's energy portfolio, from strategic advisory through to programme delivery. Matt's role will see him work with customers, partners, communities and the wider industry with a view to ensuring **Costain** continues to build on its strong heritage in engineering and design, project delivery and energy solutions to create connected and sustainable infrastructure that helps people and the planet to thrive.

- **Costain appoints new non-executive director**
- **Network Rail appoints Costain to strategic national rail framework**
- **Costain to partner with U-Battery Developments Ltd on modular nuclear reactor design**

Sam White, natural resources managing director, said: "Our engineering and consultancy experts are

supporting customers, industrial clusters, and key stakeholders with their strategic intentions in energy resilience and energy transition. To move more quickly towards a decarbonised economy, Matt will focus on energy transition services to support existing energy organisations and those developing new technologies in the market.”

Matt said: “I have been impressed with the approach to energy transition, and the strong position [Costain](#) has in the energy market, with projects such as the South Wales Industrial Cluster, bp Teesside and the Acorn project in Scotland. I look forward to collaborating with colleagues to further shape, create and deliver engineering and digital solutions to further decarbonise the energy landscape.”
