

EXCITING NEW Composite and GRP capabilities on stand P8 Advanced Engineering 2019 at NEC

August 16, 2019

With their new RTM and Hand lay-up facilities in Hungary now fully on stream , COMPOTECH AG UK are able to offer their growing UK customer base very economic low volume manufacturing capabilities to complement their proven excellence of their SMC Composite and GRP manufacturing that has been servicing customers Europe wide over the last 40 years.

“This now makes us a true one stop shop for our customers” says Peter Rawson the UK business development manager. “Our excellence , competitiveness and experience in SMC production over many years , couple with our capabilities to fully finish parts and assemblies for customers in Rail, Automotive, Medical Equipment, Electrical, Industrial applications for both small and large sized parts makes us the ideal partner.”

Now able and ready to service UK and European customers with volumes from 1 to 1000s together with presses up to 2,000 tonnes, full finishing and assembly capabilities, two paint lines and distribution, we look forward to talking with existing and potential customers at the NEC in October.

On show will be parts for Rail, Transport, Automotive, Machine covers and Sanitary.

Peter will be on hand throughout the exhibition to discuss customer needs and solutions, together with colleagues.
