

# Innovation Lab conference opens delegate registrations

December 13, 2023

The industry's **Innovation Lab**, which will bring together over 600 Security and FM senior stakeholders, is set to take place on Thursday 15 February 2024 at the home of this year's Eurovision Song Contest, ACC Liverpool.

The event will welcome innovators, thought leaders, and expert speakers from across the industry, delivering a day of solution exploration, professional development, and peer-to-peer networking. It will challenge the status quo and provide tangible strategies that help future-proof organisations, especially as technology continues to evolve at an exponential rate.

Over 50 innovators are set to showcase their latest solutions, allowing delegates to interact with emerging cutting-edge solutions and assess their viability within day-to-day operations before committing to substantial capital investments. This, in turn, will help them adapt to market changes in a flexible and cost-effective manner.

The event will also host various expert speakers to address trending topics that are likely to impact organisations in the years to come. These talks will feature technological advancements such as

automation, machine learning, and artificial intelligence, followed by leadership, ESG, as well as subject specific talks around security, facilities management, and rail.

Confirmed attendees include senior stakeholders from the UK's largest organisations such as Jaguar Land Rover, Tesco, Northern Trains, Avanti West Coast, Southbank Centre, ExCeL London and many more.

Chief Executive Officer of the event's host, **Carlisle Support Services**, Paul Evans said:

"As futureproofing becomes increasingly important in the face of ever emerging technological advancements, we look forward to challenging the status quo alongside world-class brands and like-minded stakeholders.

We are excited to welcome over 600 attendees and offer a new perspective on sustainable innovations and robust change management for successful implementation of technological breakthroughs within existing workforce."

Event registrations for the Innovation Lab are now open on Eventbrite at <https://carlisleinnovationlab.eventbrite.co.uk>.
