

Investment in new fleet

January 2, 2020

Allen Transport has a new tool in its armour as a leading supplier and transporter of heavy construction and excavation materials and equipment.

The new tipper truck will enable the company to meet an increasing demand in its services throughout the UK.

The latest-specification tipper has the durability and robustness needed for the demands of the largest projects in the construction and civil engineering sectors.

The truck is equipped with an open-box bed, which is hinged at the rear and equipped with hydraulic rams to lift the front, allowing the material in the bed to be deposited on the ground behind the truck at the site of delivery.

It joins a full range of dozens of vehicles and heavy machinery – including vehicles, excavators, tractors and low loaders – capable of handling haulage and logistics projects in multiple industry sectors.

Mr Allen said: “A key to our continued success is a willingness to invest in our equipment.

“The new tipper truck adds to our extensive number of vehicles making sure we can provide our clients with the best in equipment, with a full range of vehicles and heavy machinery capable of handling haulage and logistics projects in multiple industry sectors.”
