

Maccaferri webinars: Technical knowledge, new techniques and project examples

September 22, 2021

Maccaferri will be conducting the latest in its series of live technical webinars on Thursday (September 23) at 12.30pm.

[Click here for more details or to attend.](#)

For the last 140 years the company has designed and manufactured innovative, long-lasting and environmentally friendly solutions for civil engineering.

The latest webinar is titled Design of rockfall and slope protection measures using MacRO and Mac S-Design software webinar.

Technical Manager Mike Horton, who is leading the webinar, said: "I will explore the use of two Maccaferri softwares for Rockfall and Slope protection.

"MacRO Studio software is for the design of drapery and pinned drapery rockfall protection and Mac S-Design software for the design of stabilisation of soil slopes using soil nails and flexible mesh facings."

It will be 45 minutes of concentrated learning and you'll be able to ask questions and you will gain a CPD certificate.

Future webinars

Fri 15th October – Greener construction: Erosion protection and river bank works – Pete Richardson (Area Engineer)

Wed 17th November – Greener construction; Introduction to geosynthetics and their uses – Scott Harvey (UK & Ireland Sales Manager)

Fri 10th December – Reinforcement or Stabilisation? The different uses for geogrids and geocomposites in construction – Nathan Jackson (Area Engineer)
