

# Milwaukee Composites: Celebrating 25 years of excellence

July 24, 2023

Milwaukee Composites Inc (MCI) has launched an appeal for brand ambassadors to help celebrate its involvement in their successes as part of its silver anniversary.

Since 1997, MCI patented lightweight panels have provided fire protection, moisture resistance and light weight without the delamination issues commonly found with traditional (plymetal) panels for mass transit.

Jeffery F. Kober, CEO/President, said: "Unlike many others in this supply chain, we're happy to sell direct to customers and end users alike, to discuss designs with you and to arrange warehousing and distribution.

"Part of creating a sustainable business is to work in partnership with clients for mutual success. Ours is a premium brand of which we're proud and we offer whole life savings because it's all about miles of smiles in use."
