

# Network Rail: Package of rail works planned in East London to improve reliability passengers

June 8, 2022

Network Rail says a package of rail works is planned from this weekend (11 and 12 June) to reduce delays and improve reliability of rail services for passengers travelling between London, Enfield Town and Cambridge.

Work begins on Saturday 11 June and at weekends throughout June and July. The work includes:

- Renewal of a crossing unit and a turnout unit at Seven Sisters, these are pieces of track that allow trains to move from one line to another
- Structure repairs to Seven Sisters Road (A503) will also be carried out during the closure.

Work also continues on the Gospel Oak to Barking line throughout June and July . This work includes:

- Renewal of wheel timbers that help keep the track in place
- Works to Upper Holloway footbridge

Maintenance, structure examinations, drainage inspections and essential vegetation clearance will also

take place on both lines while they are closed.

This work is essential to keep services running safely and reliably and to reduce delays on these busy rail lines. Passengers are advised to check how the work will affect their journeys.

Ellie Burrows, Network Rail's route director for Anglia, said: "We're committed to improving reliability and driving down delays and cancellations for our passengers across London and Anglia. This package work is essential to keep services running safely and on time."

Rail services will be affected on the following weekends:
