

New Year Success for AmcoGiffen

January 3, 2019

Going in to the New Year with some strong successes under its belt, AmcoGiffen collaborated with IP Wales, Atkins, and sub-contractor, **CRITICAL RAIL LIMITED**, to refurbish Platform 1 of Severn Tunnel Junction Station in Caldicot, South Wales.

Taking place over an abnormal possession, the contractor's key tasks involved the removal of the existing coping stones and surfacing, followed by the installation of combined tactile/coper units, re-gauging, drainage and surfacing works.

Planning the works during a period when the station was already closed, disruption to the travelling public was kept to a minimum. Successfully improving the overall customer experience for the future, AmcoGiffen also handed the site back 14 hours ahead of schedule- a brilliant way to kick off 2019 for the firm.
