

Onwave Announces Andy Mehaffey as Managing Director- Rail

February 2, 2023

Andy Mehaffey has recently joined Onwave as Managing Director – Rail to lead the implementation of our OWL geo-fencing platform and other Onwave technologies within the Rail sector.

With over 25 years of experience on Infrastructure projects, Andy has joined the Onwave team to lead our work within the rail industry. Andy has worked with large organisations within rail including: Network Rail, Volker Fitzpatrick, Laing, and Osborne. Andy brings not only a wealth of knowledge but an understanding of the daily challenges that the industry faces making him a valuable asset to the team.

Andy said: “I am excited to be part of the future success of OWL and look forward to seeing the benefits and positive outcomes that it will bring”.

Onwave’s CEO Stuart Ladbroke said: “We are delighted to have Andy join the business at this exciting time. We look forward to growing the delivery capabilities of the business to complement our recently launched OWL product, with Andy’s support and guidance. We look forward to developing new ideas and know that the experience he brings to the role will help the long-term success of both OWL and Onwave. OWL technology is continuing to aid our customers in protecting their people and we can’t wait for Andy to

be a part of this journey.”

Onwave have become the market leaders of geofencing technology with our innovative solution, OWL. OWL is a product approved geofencing solution as referenced in the recently updated Network Rail Standard NR_L2_OHS_501_W4 which details how the technology can be deployed to improve Track Worker Safety. In the context of Rail, OWL enhances situational awareness, reduces the risk of human and plant interaction and increases the efficiency of possession management.
