

Rail Forum's InfraTalk is back – and now it is live

May 25, 2022

After three successful online infrastructure networking events the **Rail Forum** is taking InfraTalk on the road to Rail Live.

Rail Live is the largest outdoor rail exhibition in the UK, which brings the rail industry together in a real railway environment.

InfraTalk Live will take place on day one, Wednesday 22nd June, with two sessions during the day. The sessions will be held in a dedicated space within the Advance in Rail marquee (P80) and will each have a Network Rail region and Tier 1 hosts.

Pre-registration is essential.

Like the online version the format for InfraTalk Live promises a 'pure networking' environment for the railway infrastructure sector with no presentations, no applications and no appointments, giving easy access to

engage with key representatives from a number of Tier 1s and Network Rail regions.

To book a place visit the Rail Forum website [here](#). Places are limited to one per company/group.
