

Relocation of Whitmore Europe Ltd's UK operations

July 22, 2022

Whitmore Europe Ltd has relocated its UK operations Headquarters from Welwyn Garden City, Hertfordshire to much larger facilities in Dunstable Bedfordshire.

Whitmore Europe Limited is part of the CSW Industrials group of companies and is wholly owned by the Whitmore Manufacturing LLC Company based in Dallas Texas.

It consists of Whitmore Industrial, Jet-Lube, Air Sentry, OilSafe, Kats Coatings, Whitmore Rail and is a leading provider of innovative products and services which increase the productivity, reliability and lifespan of mission critical operating equipment.

Sean Harsent, managing director at Whitmore Europe Ltd said: "The relocation to larger facilities enables Whitmore Europe to consolidate its current footprint of warehouses and external fulfilment centre into one single location.

"Our new facility is approximately four times larger than the Welwyn Garden City location and has a much larger volume of warehousing space coupled with a secure external storage area. The move enables

Whitmore Europe greater control of stocked inventory, increased inventory volumes, an increase in administration efficiency, enhanced customer service levels and reduced order to despatch timescales for UK stocked products.

“The larger facility also coincides with our strategic growth plans and provides a foundation for success in this next phase of Whitmore Europe’s evolution.”
