

Signal Footwear Goes Global

February 8, 2023

Signal Safety footwear has undergone a complete transformation, now boasting exceptional quality, durability, comfort, and style. Richard Bowen, managing director at Safeaid explains more

“Here at Signal Footwear, we are proud to introduce our completely redesigned range, focusing on exceptional quality, durability, comfort, and style. Most of our range is now European-made to ensure an ethical supply chain and reduce lead times, which aligns with our passion for sustainability and also means we are no longer reliant on Far Eastern-driven supply line.

We ensure that all styles meet the latest safety standards, including slip resistance, sole perforation resistance, scuff cap abrasion resistance, and water resistance. I’m particularly proud of two of Signal’s standout products: the High leg fully waterproof Challenger and the Combat with an internal metatarsal protector. The metatarsal protector offers maximum protection while remaining flexible.

In line with our commitment to achieving Net Zero by 2030, Safeaid have made the entire Signal range carbon neutral, working closely with an accredited third party under strict guidelines. In 2021, we launched the Faster, Greener, Smarter initiative, which includes next day delivery on branded clothing, the UK’s first carbon neutral PPE range, and the most advanced PPE ordering system in the UK.

With 47 years of experience in the industry, we are honoured to offer trusted products to our customers. Thank you for choosing Signal Footwear.”
