

Stadler gets things moving

June 29, 2023

Stadler has been building trains for over 80 years. The provider of mobility solutions in rail vehicle construction, service and signalling technology has its headquarters in Bussnang, Switzerland.

It has a workforce of over 13,500 based in various production and engineering locations as well as more than 80 service locations. The company is conscious of its social responsibility for sustainable mobility and therefore stands for innovative, sustainable and durable quality products. The product range in the field of mainline railways and city transport includes high-speed trains, intercity trains, regional and suburban trains, metros, tramways and trams. Stadler also manufactures main-line locomotives, shunting locomotives and passenger carriages. It is the world's leading manufacturer in the rack-and-pinion rail vehicle industry.

Stadler in the UK

Stadler Rail Service UK Limited is a subsidiary of Stadler Rail AG Switzerland, providing services to a growing number of customers in the United Kingdom. Headquartered in Liverpool, SRS UK offers maintenance work and efficient all-round service for rail vehicles.

Since signing our first contract in 2016, Stadler has grown within the UK and now employs more than four

hundred people across our depots in Cardiff, Glasgow, Liverpool, Newcastle and Norwich. We are establishing a reputation as a competitive provider of train maintenance services and have seen a number of successes since emerging in the UK seven years ago. Our next stop will be Leicester as we look to expand from passenger service into freight vehicles and over the next few years, over 200 Stadler trains will be joining the UK rail network.

Stadler can offer you the chance to join a growing organisation that puts the future of rail at the heart of it's business. Never satisfied with standing still, we are always looking for new opportunities whether that be new contracts or new technologies and our roles can offer you the chance to be part of this in a variety of capacities; perhaps you are interested in supporting the commissioning of the new units or maybe you want to be part of the safe delivery of service every day. Do your strengths lie in ensuring the reliability of our units within the performance team or are you dedicated to the health and safety of our employees through QHSE? Whatever your passion, there is something for everyone at Stadler.
