

Technical recruitment specialist Clemtech celebrates 25 years of success

May 10, 2023

Clemtech, a leading technical recruitment specialist, is proud to announce its 25th Year Anniversary of operating in the rail industry. For a quarter of a century, Clemtech has been providing recruitment services to the rail sector, matching highly-skilled professionals with reputable clients.

Founded in the same month in 1998, Clemtech has since built a reputation for excellence, reliability, and professionalism. The business has successfully placed thousands of candidates in a wide range of rolling stock roles.

The company delivers both permanent and temporary labour solutions across the UK and Europe – supporting new train introduction, maintenance, modification, C4 overhaul and C6 refurbishment of rolling stock vehicles.

Commenting on the milestone, Clemtech's Managing Director, Andrew Clements, said, "We are delighted to be celebrating our 25th anniversary. It's an incredible achievement and a testament to the hard work and dedication of everyone in the Clemtech team and of the contractors who support us on a daily basis.

“We have come a long way since our early days, and we are proud of the impact we have had on the rail and rolling stock industry as the labour provider of choice.

“As we look ahead, we do so with a continued focus on the rail industry, but also with a firm eye on new and emerging sectors for us, including critical transport, marine, defence and renewables.
