

“We have never seen anything like this in the 75-year history of JCB”

June 29, 2021

JCB has started a fresh recruitment drive for 500 new shop floor employees as demand for its machinery continues to soar.

The company is setting on the additional agency employees at its 11 plants in Staffordshire, Derbyshire and Wrexham – on top of the 850 shop floor jobs already created so far in 2021.

JCB is also offering an additional 300 agency employees permanent JCB contracts – which will bring the total number of agency shop floor employees given permanent jobs this year to 1,000.

Graeme Macdonald, JCB Chief Executive Officer, said: “The recovery continues to gather momentum and we have tens of thousands of new machine orders sitting on our books stretching well into next year.

“We have never seen anything like this in the 75-year history of JCB. As well as earning a competitive salary with the opportunity for overtime and enhanced shift allowances, there is great potential for new recruits to progress to permanent roles with JCB.”

The moves follow record demand for JCB's construction and agricultural products, with most new machines already sold out until next year.

To apply for the jobs visit <https://jobs.guidantglobal.com/clients/jcb> or text JCB to 82228.
